Scald Prevention Safety Tips

A scald injury can happen at any age. Children, older adults and people with disabilities are at high risk. Hot liquids from bath water, hot coffee and soup from the microwave can cause devastating injuries.

- Teach children hot things can burn and install anti-scald devices.
- Have a “Kid-Free Zone” of at least 3 feet around hot food or drinks.
- Open food from a microwave slowly, away from the face.
- Allow food from a microwave to cool before eating.
- Never heat a baby bottle in a microwave. Use warm water from faucet.
- Test water before showering or bath. Water should feel warm, not hot!
- Treat a burn fast! Cool the burn with water, 3-5 minutes.
- Cover burn with clean dry cloth.
- Seek medical attention if necessary.

502D MISSION SUPPORT GROUP

Sam Houston Before the Battle of San Jacinto

"We view ourselves on the eve of battle. We are nerved for the contest, and must conquer or perish. It is vain to look for present aid: none is at hand. We must now act or abandon all hope! Rally to the standard, and be no longer the scoff of mercenary tongues! Be men, be free men, that your children may bless their father's name."
